

## Preview of Innovation 20

<http://stardust.jpl.nasa.gov/photo/artist.html>

**Interview:** NASA's Stardust project went on a research expedition to the origins of the solar system 4.5 billion years in the past. One of the "travelers" was Prof. Dr. Falko Langenhorst from the University of Jena and the 2007 Leibniz Award winner who reports on the results in an interview.

**Reader survey:** Issue 18 marked the relaunch of Innovation. Is it to your liking? A reader survey gives you the opportunity to let us know what you think.

**Look at Laureates:** Ahmed Zewail and Eric A. Cornell have made it to the top – they received the Nobel Prize. But other winners of the Carl Zeiss Research Award have also been busy – we will report on them regularly in the "Look at Laureates" category beginning with issue 20.
